Agriculture at a Crossroads - Business as Usual is Not an Option!

Why should up to 811 million people on our planet be going hungry while 1.9 billion are suffering ill effects of overweight and obesity? In 2019 more grain was harvested than ever before: 2.7 worldwide. Despite this record-breaking harvest, only 43% was used to feed people. The rest to feed livestock, fill our petrol tanks, support industrial production processes or was simply w global food system is one of the most significant contributors to climate change, loss of biodiv pollution and water shortages as well as preventable disease, poverty and injustice.

On behalf of the United Nations and the World Bank, in a four-year-process, more than 400 \$ summarised the state of global agriculture, its history and its future. The outcome was the Inf Assessment of Agricultural Knowledge, Science and Technology for Development (IAASTD) findings are uncomfortable and alarming: providing a warning on the misleading ways of the showing new ways forward. This website makes the IAASTD's findings available by topics, reports as well as updated figures, background information and news.

Global news update:

16/09/21 +++ UN report calls for "repurposing" of harmful agricultural subsidies +++ NEW 06/09/21 +++ Food Systems Summit is not a people's summit, says UN expert +++ 30/08/21 +++ Drought threatens the livelihoods of farmers in Afghanistan +++

09/08/21 +++ IPCC sounds alarm over intensifying irreversible climate change +++
